### Projects

#### Roami, Pinterest-like web app [🔗](#)

- Django and React based web app.
- Create, manage, and share your pins. Like other pins and follow other users, and more features.
- Includes integrations with some Google APIs.

#### Lessons With A Native, language learning website

- Language learning website built with Django.
- Create tests and quizzes, track student progress, email students, manage your learning system, and more.
- Uses the Nord theme for the design.

#### PCF Labs, Custom e-commerce website [🔗](#)

Dec 2022

- Built with Django.
- Uses Stripe for payment processing.

#### Portfolio, NextJS-based [🔗](#)

- Website built with NextJS.
- Database integration with Postgres using prisma.
- Hosted on Vercel

### Professional Experience

#### Freelance Programmer, Fiverr [🔗](#)

Jan 2020 – present | Remote

- Built and maintained websites and programs for a range of clients on Fiverr
- Developed skills in client communication and project management
- Experience with a variety of projects including websites, browser extensions, automation scripts, and bots

### Profile

I'm a self-taught developer and have been writing code for 4 years now. During that time, I've built everything from websites, automation scripts, and discord bots to APIs, desktop and mobile apps, and more. I really enjoy programming and building cool stuff from just a text file.

### Skills

#### Backend Development

NextJS or Django

#### Frontend Development

React, Redux, NextJS

#### Databases

PostgreSQL, MySQL and MongoDB

#### Discord Bots

discord.py
