Projects

Roami, *pinterest-like web app* ⧉
- Pinterest-like image sharing web app, deployed on Vercel.
- Demonstrated full-stack proficiency, developing platform with React and Django.
- Implemented responsive design to ensure Roami is accessible on all devices.
- Integrated various Google APIs, such as Google signin to allow seamless user registration and login.

Lessons With A Native, *language learning web app*
- Provides an interactive platform for creating, organizing, and delivering language lessons.
- Incorporated the Nord theme to enhance the app's visual aesthetics.
- Built a robust module that tracks student progress on each test for educators to monitor.
- Built with Django and deployed on Vercel.

PCF Labs, *custom e-commerce website* ⧉

Dec 2022
- Custom e-commerce site that integrates with Stripe to facilitate transactions.
- Beautiful, responsive design that gives a pleasant experience on all devices.

Portfolio, *personal site* ⧉
- NextJS and Prisma based portfolio website that stores more information about me, including all my projects.
- Hosted on Vercel.

Professional Experience

Freelance Programmer, *Fiverr* ⧉

Jan 2020 – present | Remote
- Accumulated several years of freelance experience on Fiverr, offering a range of services related to web development, design, scripting, scraping, or any other relevant skills, demonstrating versatility and adaptability in delivering client projects.
- Developed strong entrepreneurial skills by managing client relationships, setting project timelines, pricing services competitively, and building a solid online freelance presence.

Profile

I'm a self-taught developer and have been writing code for 4 years now. During that time, I've built everything from websites, automation scripts, and discord bots to APIs, desktop and mobile apps, and more. I really enjoy programming and building cool stuff from just a text file.

Skills

Languages
Python, Rust, Javascript, TypeScript, Bash, HTML5, CSS3, Sass, and more

Frameworks and Technologies
Git, Github, Docker, React, Redux, NextJS, Django, Prisma, JWTs, OAuth, Websockets, RabbitMQ, discord.py, and more
